

Sea Powder

PROJECT _____

QUANTITY _____

ITEM NO. _____

Standard Features:

- ▶ Crystalline Powder
- ▶ Contains no caustic ingredients
- ▶ 8 lb. jars – 4 per case

Especially Formulated for Boiling Out Fryers

- DISSOLVES ANY GREASY BUILD-UP
- WILL EXTEND USABLE LIFE OF COOKING OIL WHEN USED ON A WEEKLY BASIS

Sea Powder is Superior at Removing Carbonized Grease Build-Up When Used with Boiling Water

Keating Sea Powder is easy to use and superior at removing carbonized grease build-up in fryer vessels – the leading cause in premature oil breakdown. If used weekly, your shortening will last one to two days longer, and your Keating fryer will be in perfect condition for years. Keating Sea Powder contains no caustic ingredients and a small amount, mixed in hot water, makes an excellent cleaner for greasy floors, walls and exhaust hoods too.

Directions for Cleaning Fryer:

Remove baskets and screen, and fill the fryer vessel to the fill level with water. Bring to a gentle boil. (**Caution:** never leave a fryer filled with water operating and unattended.) After a gentle boil has been reached, TURN THE FRYER OFF and dissolve 2/3 cup of **Sea Powder** to each five gallons of water. Permit fryer to soak for at least 1/2 hour. If there is a large build-up of carbonized grease (black build-up), allow the fryer to soak overnight. While soaking, a natural fiber brush may be used to scrub the tubes and inside walls of the fryer vessel. Drain the water and **Sea Powder** into a dry

suitable receptacle and remove from cooking area. Sprinkle **Keating Klenzer** liberally on tubes and sides of fryer vessel. At this point, a non-abrasive scouring pad may be used to remove the softened carbonized grease. Thoroughly rinse fryer vessel with potable water to remove all **Keating Klenzer**. Used on a weekly basis, **Keating Sea Powder** will increase the usable life of cooking oils and extend the life of your Keating fryer. (**Caution: water and oil in any form do not mix.**)

Keating Klenzer

- ▶ 14 oz. cans (396.9g) – 12 per case

Keating Klenzer is the finest dry stainless steel polish available. No other cleaner lasts longer and cleans better than Keating Klenzer. Stainless steel owes its sheen to innumerable fine light-reflecting scratches. When these become filled with grease, soap, dust or other foreign matter, stainless steel loses its natural luster. Keating Klenzer cleans deep down in the surface grooves to lift out dulling dirt and restore the original sparkling gleaming finish. And unlike liquid cleaners, no sticky residue is left behind. A small portion of Keating Klenzer can clean large surface areas.
