Control Panel

Replacement Instructions

- Remove 2 fryer control panel screws.
- Remove wires on the modules (mark the wires for connecting to new modules).
- Remove 4 screws holding module in place and remove module.
- Install new spark ignition module and screws. NOTE: Reinstall spacers between module and control panel back.
- Replace wires and install new spark ignition cable. Ensure all wires are tight.
- Remove screws holding control panel surround to cabinet to gain access to spark ignition electrodes.
- Remove old ignition cables and install new.
- Replace control panel surround and all screws.
- Test for proper operation.
